

The Association of Professional Engineers,
Geologists and Geophysicists of Alberta

NEWS RELEASE

April 23, 2005

APEGGA Summit Awards® Recognize Alberta's Engineering and Geoscience Excellence

Calgary - Over 900 guests attended the 2005 Summit Awards® Gala, Friday, April 22 at the Calgary TELUS Conference Centre. The event, hosted by The Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA), acknowledges outstanding individuals and corporate members for their accomplishments in engineering, geology and geophysics.

Now in its 15th year, the Summit Awards® recognize excellence across a broad range of engineering, geological and geophysical endeavours, and salute the efforts of these professionals as they work to ensure public safety and well-being. Summit Award® recipients are leaders who have a significant positive impact upon Alberta.

Eleven awards were presented this year celebrating superior leadership, early accomplishment, environmental excellence, technical and educational achievement, professional and community service, project innovation and distinguished service to the association.

This year's theme, *Proud Past: Confident Future*, reminds us during Alberta's Centennial year that the men and women who are engineers, geologists and geophysicists have not only helped to build and shape Alberta but continue to provide our province with a confident future.

Established in 1920, APEGGA is responsible for regulating the practice of engineering, geology and geophysics in the province of Alberta. The association's 42,000 individual and corporate members play a significant role in every segment of the economy, and their technical and management expertise ensure Alberta remains at the forefront of technological innovation.
